PROFESSIONAL SUMMARY

Full-Stack Developer with professional experience building scalable web applications using **Java (Spring Boot)**, **Python (Flask)**, and **Angular**. Currently contributing to the migration of a monolithic Flask application to a **Spring Boot microservices architecture**, working with **Apache Kafka**, **Spring Security**, **JWT**, **Liquibase**, **Docker**, **PostgreSQL**, and modern software development practices. Passionate about solving real-world business problems, learning new technologies quickly, and building clean, maintainable software.

PROFESSIONAL EXPERIENCE

October 2025 – Present time
Web Developer | Advocacia Bichara

I contribute to the development and maintenance of two enterprise REST APIs one built with **Spring Boot** and another with **Flask**. As part of the company's migration strategy, I work on transforming a monolithic application into a **Spring Boot microservices architecture**.

On the Spring Boot project, I have developed the **User** and **Client** modules secured with **Spring Security** and **JWT authentication**. I also contributed to implementing dynamic filtering, standardized API response patterns, asynchronous communication using **Apache Kafka**, database versioning with **Liquibase**, and a **Schema-per-Tenant** multi-tenancy architecture. Development is performed using **Git** and **Docker** throughout the software lifecycle.

On the Flask application, I maintain and develop new features, implement asynchronous task processing with **Celery**, create and maintain **Alembic** database migrations, develop CRUD operations, and resolve production issues. I also designed and implemented a complete real-time notification system using **WebSockets**, allowing instant communication between the backend and the Angular client.

In addition to backend development, I contribute to the frontend by developing responsive interfaces in **Angular**, integrating REST APIs, implementing new features, and fixing user interface issues.

EDUCATION

Faculdades Integradas do Vale do Ívai (UNIVALE)
Bachelor's Degree in Systems Analysis and Development
February 2025 – June 2027 (Expected).

TECHNICAL SKILLS LANGUAGES

Backend

Spring Boot • Flask • Spring Security • JWT • REST APIs • Celery

Frontend

Angular • Tailwind CSS • HTML • CSS

Database

PostgreSQL • Liquibase • Alembic

Architecture

Microservices • Apache Kafka • WebSockets • Multi-Tenant Architecture

Tools

Docker • Git

PERSONAL PROJECTS

Finance Saas (in development)

Backend

Spring Boot • Flask • Spring Security • JWT • REST APIs • Celery

Frontend

Angular • Tailwind CSS • HTML • CSS

Database

PostgreSQL • Liquibase • Alembic

Architecture

Microservices • Apache Kafka • WebSockets • Multi-Tenant Architecture

Tools

Docker • Git
